## EDUCATION

### B.E. Electrical Engineering

Sant Longowal Institute of Engineering and Technology (SLIET)

XII (CBSE) – Holy Mission Senior Secondary School, Patna

X (CBSE) – Loyola High School, Patna

CGPA: 7.6/10.0 | May 2026

Score: 73% | July 2021

Score: 83% | May 2019

## WORK EXPERIENCE

### Software Development Engineer (SDE)

May 2024 – July 2026

[Certificate](#)

*CBuddy – AI-Powered Learning & Productivity Platform*

*Python, LLMs, Generative AI, NLP, REST APIs, Cloud Services*

- Developed backend application modules using **Python and LLM APIs** to power core platform features including collaborative workspaces and automated task management tools.
- Created and tested scalable backend **REST API services** and refined prompt configurations to improve system performance, data retrieval speed, and contextual accuracy.

## PROJECTS

### Parametric.AI : AutoCAD AI Agent

[GitHub](#)

*Python, AutoCAD, AutoLISP, .NET API, C#, NLP, Model Deployment*

- Designed an AI agent that processes complex natural language instructions, mapping tokens into executable AutoCAD context windows for real-time design automation.
- Developed a native C# plugin inside AutoCAD execution memory to consume instruction streams, reducing latency by **40%** via optimized data preprocessing pipelines.

### Expense Tracker

[GitHub](#)

*MongoDB, Express.js, React, Node.js, Tailwind CSS, Recharts, JWT*

- Developed a full-stack financial application implementing JWT authentication with bcrypt password hashing and state management via Redux Toolkit.
- Designed RESTful API endpoints and MongoDB aggregation pipelines to process income/expense records, compute category breakdowns, and render monthly financial analytics using Recharts.
- Architected a responsive UI with Tailwind CSS and configured secure client-side routing, request interceptors using Axios, and production deployments across Render and Vercel.

## TECHNICAL SKILLS

**Programming Languages:** Python, C++, Javascript, SQL

**AI/ML Frameworks:** PyTorch, TensorFlow, Keras, Scikit-learn, NLTK

**Core Domains:** Neural Networks, NLP, Clustering, REST APIs, React.js, Tailwind

**Data Engineering:** Pandas, NumPy, Matplotlib, Seaborn, PowerBi

**Cloud & DevOps:** AWS, Docker, CI/CD, Git, Jenkins

**Core Computer Science:** Data Structures & Algorithms (DSA), OOPs, Computer Networks

**Testing:** Postman, Gatling, Selenium

## CERTIFICATION

- Data Science:** Internship and Training Completion Certificate from LearnNex. [Certificate](#)
- Data Analytics:** Internship and Training Completion Certificate from LearnNex. [Certificate](#)
- Python Programming:** Certification by Coursera [Certificate](#)

## ACHIEVEMENTS

- Competitive Programming:** Secured a peak technical competency rating of **1500** on CodeChef.
- IISc Bangalore:** Scientific review paper covering *White Dwarf Binary Systems and Binary Pulsars* officially selected for presentation.
- IIT Roorkee (Cognizance):** Clinched **1st Position** back-to-back at Plasma Pull (2025, 2026); competed in RC Plane, MicroMouse, LFR.
- Endeavour:** Convener of College Robotics Team Endeavour from 2025-2026
